Sarvesh Multi Plast India Pvt. Ltd., is one of the exclusive building materials manufacturer in India and possess more than 25 years of experience in this field. Now we have emerged with a new dimension of wooden doors in the brand name of **'Erowood'**.

'Erowood' doors are made of plantation timber and HDF door skins to produce the state of art products in an eco-friendly manner. **'Erowood'** doors are manufactured in well equipped factory with hi-tech modern machineries, and experienced work force. We adopt the national standard which proves the quality and durability of the doors. The timber used in is chemically treated and kiln dried for the internal frames and fillings, in order to resist from infestation and decay, impervious to insects, protect from fungi, rot- endowing and durability. The dimensional stability and quality can be attributed to use.

Moulded Skin Door

A moulded skin door has attained immense popularity in the constructions, owing to their aesthetic appeal and exclusive designs. The wood grain structure HDF Skin gives an elegant look and it suits all. The internal core structure is made completely out of timber or with particle board according to the requirements. These skin moulded doors are ideal for houses and commercial buildings.

Membrane & Flush Doors

Flush door is convenient option for new construction or for replacement old doors. Flush doors are semi ready made door and it can be finished according to the customer requirements. They are meant to be mixed with standard hardware and can be easily installed. **'Erowood'** membrane doors are made from finished flush doors and the same covered with pvc membrane foil. Hence doors are perfectly finished in the factory, no need to paint or polish.

Our company is unique in nature the difference lies in our proactive vision and we spare no cost and effort in investing in the latest technology and technical knowhow.
