A Product of 🝥 Sarvesh www.sarvesh.net.in

Manufactured with **GERMAN TECHNOLOGY** Optimized for INDIAN WEATHER A CONTROL OF THE OF THE

## ABOUT

**Sarvesh Multi Plast India Pvt. Ltd.** started in 2009 is one among the leading Industrial groups of home building materials. **Eroline** is the market leader in UPVC profiles in India. With a wide presence, the company provides customized solutions in window and door systems that are soundproof, dustproof, weatherproof, energy efficient, eco-friendly and are specially designed to suit the harsh climatic and environmental conditions in India.

European standard UPVC Profiles and Assisting profile are extruded indigenously in our state -of -the art production facility aided by the advanced technology machines and infrastructure. **Eroline** through its technical center at extrusion facility, provides skillful training to the work force under the international guidelines and standards.

#### Features

#### **Energy Efficient**

The multichambered design of Eroline profiles prevents the transfer of heat inside your house. This makes your house energy efficient by reducing your air-conditioning cost significantly.

## Long lasting strength

Most of the UPVC profiles tends to change its color and property due to sustained exposure to UV radiations. The engineered blend used in our eroline product is UV stabilized for all kinds of Indian weather. That gives the product for a long life.

#### Self Extingushing

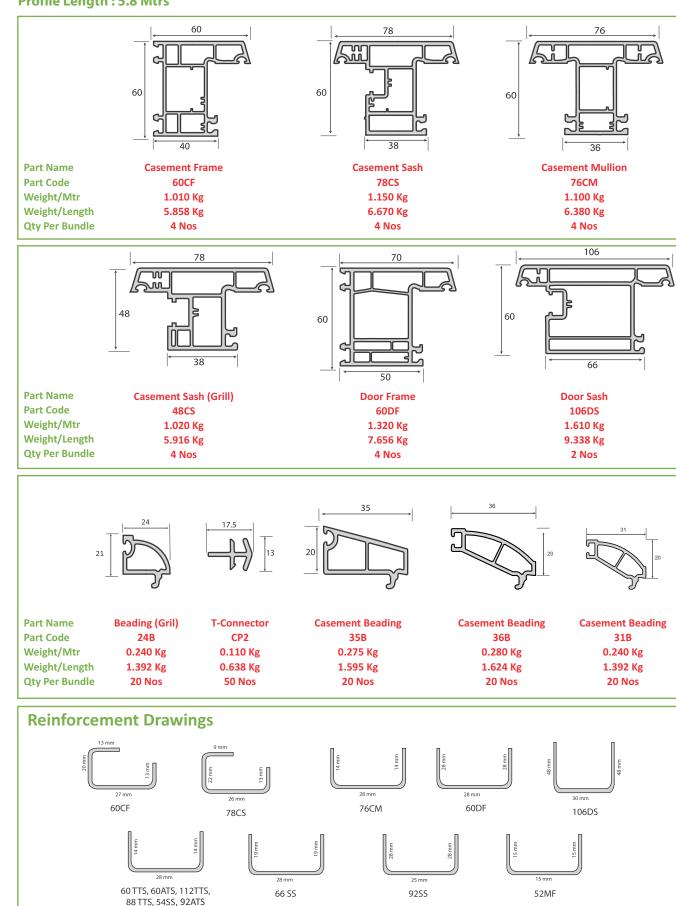

UPVC is difficult to ignite, if ignited the source of the same is taken away, UPVC self extingushies. UPVC will not support combustion and will not spread the fire on its own. upvc has one of the lowest surface spread of the flame rating compared all materials
